

## Essay

I want a piano because it can help me get better at the piano so when I grow up I would know how to play the piano very good. I also want a piano because when I'm at home and there's nothing for me to do I can play the piano so when I go to piano lessons with Miss. Carrie I would be better at the piano. The problem I get when I play the piano is when it's time to play the left hand I play with my right hand instead. So if I get the piano I can practice. I really want a piano because it's fun and interesting to play because every week we learn new notes and they are challenging so that's what make it more interesting and fun! I really hope that I win the piano, but if I don't I would still cheer for the person that win and be happy for them and just BE INSTRUMENTAL!
